

BIOIBERICA

AminoQuelant®-Cu

AminoQuelant®-Cu is a new formulated product containing L- α -amino acids obtained from our exclusive technology **Enzyneer®** and copper (5% Cu, 5% free amino acids). It's designed to increase the assimilation of copper at the critical moments of greatest need, allowing a transport much faster and more effective towards the new leaves and growing points of the plant. This element is part of essential molecules for processes such as photosynthesis, respiration and lignification. Therefore, its presence is essential to achieve the maximum level of these vital processes. Likewise, Cu also takes part in various enzymatic reactions necessary for the processes of reproduction and defense.

Benefits

- Protects from oxidative stress.
- Rapid nutritional correction in cereal crops.
- Effective in the prevention of the *repilo* of the olive tree.
- Suitable for Organic Agriculture

Data Sheet

Moments of Application and Dosage

Grain cereals: From 0.5 to 1L/ha. 1-2 applications between stages of tillering and spike 1cm.

Other crops: From 0.5 to 1 L/ha per application. Repeat if necessary after 10-15 days.

Composition

Copper	5% p/p
L- α -amino acids	5% p/p
Total N	3% p/p

(*) The formula contains each and every one of the biologically active free amino acids: ASP, SER, GLU, GLY, HIS, ARG, THR, ALA, PRO, CIS, TYR, VAL, MET, LYS, ILE, LEU, PHE, TRP.
