

AminoQuelant®-K *low pH*

AminoQuelant®- K *low pH* is a formula with a high concentration of Potassium and amino acids obtained through the exclusive Enzyneer® technology. The synergism between Potassium and amino acids allows to improve the absorption, translocation and activity of Potassium within the plant.

In addition, its neutral pH makes it a unique product in the market, for its total compatibility with hard water and with the usual phytosanitary treatments and fertilizers. Its addition to the tank does not alkalize (raise) the pH of the phytosanitary broth as the vast majority of potassium-based products on the market.

Benefits

- More colour
- Higher sugar content
- Greater fat content
- Precocity
- Larger calibre
- Total compatibility

Data Sheet

Crops

AminoQuelant®- K *low pH* can be applied to all types of crops by foliar spray or localized irrigation. It is especially suitable for fruit crops, both horticultural and fruit, tropical, olive, ornamental, industrial and extensive.

Doses

Foliar application: 2-4 mL/L or 2-4 L/ha.

Root application: 5-10 L/ha.

Moment of Application

Make several applications (every 7-15 days) from the development of the fruits or organs to the maturation or collection of them.

Composition

pH	7
Free Amino Acids	5% (p/p)
Potassium	25% (p/p)
Total N	1% (p/p)
Organic N	1% (p/p)
Organic Matter	10% (p/p)

(*) The formula contains each and every one of the biologically active free amino acids: ASP, SER, GLU, GLY, HIS, ARG, THR, ALA, PRO, CIS, TYR, VAL, MET, LYS, ILE, LEU, PHE, TRP.
