

DacusTrap®

SPECIFIC FOOD ATTRACTANT FOR THE CAPTURE OF OLIVE FRUIT FLY.

What is it? What is it for?

DacusTrap® is a system based on a specific food attractant for the capture of *Bactrocera oleae* (olive fruit fly) composed of hydrolysed proteins with a high power of attraction. The **DacusTrap®** system is an integral solution to the control of the olive fly, bringing together in one single product the **DacusTrap®** attractant and the trap (disposable flycatcher). **DacusTrap®** is a 100% organic solution that does not need any insecticide, nor in the formulation itself or in its subsequent use in the field. **DacusTrap®** system is long-lasting (140 days) and its ease of handling makes it a clean, fast and simple control method.

Benefits

- Product ready to use.
- Leaves no residue on the olives.
- Without refilling.
- Control of pest pressure.
- Product suitable for its use in organic farming according to EU standard 2021/1165. Control Ecocert SA F-32600.

CROPS

Dacus Trap® is a system designed exclusively for use in olive trees.

MANAGEMENT

The density of the **DacusTrap®** system per hectare will depend on the pressure of the pest and the size of the plot, with the usual between 50 and 100 traps per hectare.

MOMENT OF USE

The placement of the trap must be homogeneous throughout the plot, recommending its placement in the field during the first half of July.

COMPOSITION

	(W/W)	(W/V)
Hydrolyzed proteins	5%	5.4%
