

# Terra-Sorb® foliar

Amino acids for foliar application

## What is it? And what is it for?

Terra-Sorb® foliar is a product based on L- $\alpha$ -amino acids obtained by the exclusive Enzyneer® technology for foliar application. It is a product with a high ratio of free amino acids to total (high degree of hydrolysis). It is characterized by its high speed of action and excellent compatibility in foliar application mixtures.

### Benefits:

- Increases photosynthetic activity and chlorophyll content
- Rapid recovery from stress situations
- Improves the quality of fruit set

## Technical Data sheet

Terra-Sorb® foliar is a certified input suitable for Organic Agriculture.

### Crops:

Terra-Sorb® foliar can be applied in all types of crops: leaf horticulture, fruit horticulture, strawberry, stone fruit, pip fruit, citrus, olive, vine or grape, tropical, industrial, extensive crops, etc.

### Dose:

Perform 2 to 4 foliar applications at 2-3 mL / L or 2-3 L / ha. In case of strong stress the dose can be increased.

### Moment of application:

Its use is recommended at all times when the crop needs a nutritional and physiological stimulus, such as:

- Start of vegetation, as soon as it reaches enough foliar mass
- Prefloration and falling of petals
- Development of vegetable organs to collect

Its application is also recommended when the crop is subjected to unfavorable conditions (drought, cold, salinity, wind, root asphyxiation, etc.) and recovery treatments after critical periods (transplant, damage by frost, hail, wind, etc.). .)

### Composition:

Free amino acids (\*) 9.3% (w / w)  
Nitrogen (N) total 2.1% (w / w)  
Nitrogen (N) organic 2.1% (w / w)  
Boron (B) 0.02% (w / w)  
Manganese (Mn) 0.05% (w / w)  
Zinc (Zn) 0.07% (w / w)  
Organic matter 14.8% (w / w)

(\*) The formula contains each and every one of the biologically active free amino acids: ASP, SER, GLU, GLY, HIS, ARG, THR, ALA, PRO, CIS, TYR, VAL, MET, LYS, ILE, LEU, PHE, TRP.
