

Terra-Sorb® radicular

What is it? And what is it for?

Terra-Sorb® radicular is a product based on L- α -amino acids obtained through the exclusive Enzyneer® technology for root application.

It is the first formulation developed specifically for the application via soil and today is the leader in this type of application.

The L- α -amino acids of Terra-Sorb® root penetrate the roots increasing the metabolism and photosynthetic activity of the plant. They also contribute to root development and improve the absorption and transport of nutrients from the roots.

Benefits:

- Promotes root development
- Improves absorption of nutrients
- Helps to better overcome stress situations
- Contributes to the precocity and homogeneity of the harvest

Data Sheet

Crops:

Terra-Sorb® radicular can be applied in all types of crops: leaf horticulture, fruit horticulture, strawberry, stone fruit, pip fruit, citrus, olive, vine or grape, tropical, industrial crops, etc.

Doses:

Apply 10-15 L / ha every 7-15 days through localized irrigation.

In case of more frequent applications, divide the dose.

It can be applied with the fertilization of the crop through localized irrigation or by injection into the soil.

Moment of application:

Its use is recommended at all times when the crop needs a physiological stimulus, such as: Beginning of the vegetative cycle, prefloration and fruit setting, Development of the vegetable organs to be harvested.

Its application is also recommended when the crop is subjected to unfavorable conditions (drought, cold, salinity, wind, root asphyxiation, etc.) and recovery treatments after critical periods (damage by frost, hail, wind, etc.).

Composition

Free Amino Acids	6,0% (p/p)
Total N	3,0% (p/p)
Ammonia N	1,8% (p/p)
Organic N	1,2% (p/p)
Organic Matter	8,0% (p/p)

(*) The formula contains each and every one of the biologically active free amino acids: ASP, SER, GLU, GLY, HIS, ARG, THR, ALA, PRO, CIS, TYR, VAL, MET, LYS, ILE, LEU, PHE, TRP.
